ABSTRACT OF THE DISCLOSURE

A composite image generator for combining a prestored composite background image, a prestored composite foreground image, and a composite interior image is disclosed. The composite interior image is preferably generated by the composite image generator by interlacing a prestored interior image with a captured digital image. Portions of the composite background image are deleted or hidden based on the composite interior image. Similarly, portions of the composite interior image are deleted or hidden based on the composite foreground image.
